CLASSICAL EDUCATION

Classical education is grounded in the notion that training in the *Trivium*- Grammar, Logic, and Rhetoric - must precede specialized study in a particular field. The goal is to equip students with a well-trained mind so that they can be self-learners for the rest of their lives. These three "skill sets" are also commonly referred to as "stages," because attention to the intellectual development of students show that they pass through periods of growth that are more conducive to training in the different tools of the *Trivium*. Though we offer the same core subjects, what sets a Classical School apart is this commitment to training in the *Trivium*. The skills learned via Grammar, Logic, and Rhetoric apply equally to our robust STEM courses. Math and Science have their own methods distinct from the humanities, but they employ the same intellectual faculties of observation, analysis, and expression. The *Quadrivium* builds on the skills learned via the *Trivium*.

MISSION STATEMENT

The mission of St. Ambrose Academy (SAA) as a private, Catholic co-educational school is to assist parents in the formation of their children by providing a classical (liberal arts) education rooted in the Catholic Faith. Our students study theology and college preparatory subjects through the teachings of the Magisterium and the primary works of civilization's greatest thinkers. Through a unified and rigorous program of study, SAA equips students with progressive tools of learning, critical thinking, and elegant expression of truth. Such an education frees them to pursue and choose the true, the good, the beautiful, and the one – and thus, they are able to bring wise order, compassionate help, and radiating joy to our world, that always finds itself in the tension of this freedom.

HISTORY

SAA was founded in 2003 and is located on the west side of Madison - not far from the University of Wisconsin, state government, and business districts. The lay founders – mindful of St. John Paul II's call for a New Evangelization – recognized a need to recover the genius of a liberal arts training married to intentional Catholic formation, in order to foster wisdom and virtue most reliably and fruitfully. Since opening its doors with 10 students, the Academy has grown to 217 full-time students today – enjoying a growing breadth of athletic, club, and extracurricular activities and service opportunities that assuredly contribute to the well-rounded maturation of each individual student.

FORMING THE COMPLETE PERSON

The pursuit of education begins with wonder and aims for wisdom. Most students will pursue continuing education, because truth sets a person free to think and act rightly, with more forceful impact for the common good. As the school has matured in effectiveness in teaching and guidance, increasingly, students see the economic and salvific value of pursuing higher education. Nevertheless, there will always be room for a vocational call to go into the work force or military and we do not see following this call after high school (thus lowering college placement stats) necessarily as a negative. It is vocational, and we'll always encourage each individual to reach out for his or her highest potential and gift to society.

GRADUATION REQUIREMENTS

SAA grants three types of diplomas: Classics, Standard and Transfer.

A **Classics Diploma** is the highest level of education SAA offers and requires 24 core course credits with a total of 27 credits.

A **Standard Diploma** requires 20 core course credits and 24 total credits.

A **Transfer Diploma** is offered for late transfers with a customized course of study.

	<u>Classics</u>	<u>Standard</u>
Religion	4	4
English	4	4

GRADING SYSTEM:

SAA uses a four-point grading system:

A = 4.0	B+ = 3.33	C+ = 2.33	D+ = 1.33
A- = 3.67	B = 3.0	C = 2.0	D = 1.00
	B- = 2.67	C- = 1.67	D- = 0.67

NATIONAL LATIN EXAM:

Since SAA began taking the exam in 2006, we have had 62 Gold Summa Cum Laude medals. Listed below are test results from Latin I to Latin V taking the National Latin Exam from the past decade:

ADV. PLACEMENT TESTS

AP courses are **not** offered because the liberal arts approach esteems versatility and penetration of thought, fineness of analysis, and gifts of expression over ability to regurgitate a copious set of facts. Nevertheless, students are encouraged to take AP exams and the soundness of academic prep at St. Ambrose prepares students for success on these exams.

St. Ambrose Academy Course of Study

SENIOR HIGH

The St. Ambrose curriculum is designed to provide an outstanding foundation in the critical academic disciplines of math, science, history, literature, logic, rhetoric, composition, and Latin, crowned by regular study of and growth in the Faith. Our approach to learning includes in-depth study of the classical works of the western world and the great works of Christendom. Our religion studies focus on the analysis and understanding of the Scriptures and significant Church documents (such as the Church Fathers, the writings of the saints, papal encyclicals and the Catechism). Our classes revolve around Socratic questioning, analysis of the text, discussion, debate, presentations, and regular papers.

Our dedicated faculty uses a variety of methods to give our students the tools they need to master our curriculum with an enthusiasm that comes from true understanding of the profound ideas of the ages. Works are studied in an introductory manner suited to the intellectual capacity of the students; students are not expected to display exceptional ability or college-level understanding. One of the characteristics of “great books” is that they are accessible, like Sacred Scripture, on a wide variety of levels. One needs no specialized training to see their beauty and experience their power.

There are seven core subject areas at St. Ambrose Academy: English, history, Latin, math, religion, science, and philosophy.

Humanities Overview

The humanities courses follow a historical progression, taught in a four-year cycle (Cycles I, II, III, and IV). The historical topic for each cycle is integrated throughout the other courses, resulting in a unified and interdisciplinary approach to each historical period. The objective of this division is to observe the birth, height, and decline of the civilizations that were dominant in the development of Western Civilization, and to study the spirit and intellectual history of each age in its politics, literature, art, etc., alongside the Gospel proclamation. The ninth and tenth graders alternate between Cycles I and II, while the eleventh and twelfth graders alternate between Cycles III and IV. Though the grades are combined to share the same content, the skills being taught are distinguished according to grade level, as are the assessments and expectations.

	English	History	Latin	Religion
SH I	Ancient Greece and Rome 3100 B.C. - 400 A.D		Latin I	Sacred Scripture
SH II	Medieval / Renaissance Europe 400 A.D. - 1650 A.D		Latin II	Logic/Church Fathers/Scholasticism/ Reformation
SH III	America / Government 1500 A.D.- Present		Latin III	Moral Theology/Liturgy & Sacraments
SH IV	Enlightenment to Contemporary 1700 A.D.-Present		Latin IV	The Church in the Modern World/Catholic Social Teaching

Major literary works form the core of the **English** literary curriculum: *The Iliad* by Homer, *The Aeneid* by Virgil, *The Divine Comedy* of Dante Alighieri, and the works of Shakespeare. The

story of the twentieth century is told by such works as Solzhenitsyn's *One Day in The Life of Ivan Denisovich* and John Steinbeck's *Grapes of Wrath*. Works such as these help the student begin to understand the human condition including its dignity and beauty as well as its social, political, and philosophical difficulties. While the study of literature is critical for the development of writing, analysis, and rhetorical skills, it is the transcendent truth explored by each author that is the point of the composition and the object of its study.

Religion course material is paired with the historical framework, offering a complete overview of Church History, but also includes a thorough study of Scripture and Exegesis, the Sacraments, Moral Theology, and Catholic Social Teaching.

The **History** curriculum introduces the student to the great historical works, including the writings of Herodotus, Thucydides, Plutarch, Livy, Tacitus, and medieval chroniclers. The last two cycles feature an in-depth study of the formation and function of the American government and the events of contemporary times with primary texts from the Founding Fathers, Karl Marx, Adam Smith, and other texts that have shaped and impacted the world in which we currently live.

Logic and rhetoric are covered in the Senior High Religion and English courses. Given the opportunity to read, understand, and discuss the great works, the high school graduate is fully prepared to enter the work force or attend any college or university in the United States or abroad.

Latin studies continue with all students completing a minimum of Latin II, which includes the complete study of the full indicative verb system. Students pursuing the Classical Diploma will complete Latin IV, which concludes the grammar studies and culminates in primary Classical Latin sources. When warranted, Latin V is offered, which covers Caesar and Vergil. Latin students are also taught to pray in Latin, including all of the prayers of the Rosary, the Mass parts for the Ordinary, the major Marian prayers, and the Eucharist Hymns of St. Thomas Aquinas. Students use the classical pronunciations for classical texts and classwork, and ecclesiastical pronunciations for all prayers, mastering both styles and earning the ability to transition fluidly between the two.

Advanced Placement

St. Ambrose Academy does not offer advanced placement courses as such. However, we recognize the value of these courses and will endeavor to offer preparatory guidance for certain AP exams for students who receive permission from the principal. The form this guidance takes each year will depend on student interest, faculty availability, and other factors, and may take the form of extra weekly meetings or independent study with a teacher or online courses. Some courses in our curriculum are more conducive to AP preparation (such as Biology II, Calculus II, and Latin V). St. Ambrose students tend to do well in the Literature and History AP courses with only a minimum of extra-curricular study. St. Ambrose Academy will host any AP course requested by a student that it is within our power to administer.

English

Having completed their grammar studies, St. Ambrose Academy Senior High students now focus exclusively on literary analysis and composition. Literature is drawn from reading lists that are integrated with the history course and are studied not only for the sake of literary criticism, literary tropes, and style, but also for the themes of the age that the works represent, and the timeless struggles of the human person.

Basic Writing Course:

Each year students develop and expand upon the writing goals of the prior year so that by graduation the student is proficient not only in the skills necessary for writing the modern college research paper, but in a variety of other styles for diverse audiences according to the contingencies of the rhetorical demands. Cycles I and II focus primarily on the essay form; Cycle III focuses on poetry, speech, and editorial; Cycle IV on analysis papers in support of a thesis.

English I, Ancients

English Cycle I studies the foundational texts for Western Literature and explores the ethos and stylization of ancient literature. English I also begins the practice of writing the standard academic essay.

Required: Either the complete <i>Iliad</i> or <i>Odyssey</i> by Homer, with selections from the alternate text Virgil, <i>The Aeneid</i> Sophocles, <i>Three Theban Plays</i> (ISBN 978014044425) Shakespeare, <i>Julius Caesar</i> or <i>Troilus and Cressida</i>	Additional Selections From: Aeschylus, <i>Oresteian Trilogy</i> Ovid, <i>Metamorphoses</i> (Dryden’s public domain version) Cicero, selections
---	--

English II, Medieval / Renaissance

English II focuses on the medieval and renaissance periods, following the manner in which the ancient literature develops and expands within and alongside the literature of Christendom. English II is also a continuation of the study of the academic essay, striving for greater style.

<p>Required: “Everyman” <i>Beowulf</i> (ISBN: 0-393-32097-9) <i>Sir Gawain and the Green Knight</i> (ISBN: 978-0-345-27760-2) Chaucer, <i>The Canterbury Tales</i>, selections (SAA edition) Spenser, <i>Faerie Queene</i>, Book I (ISBN: 0-87220-808-7) Shakespeare, <i>Romeo & Juliet</i>, <i>Midsummer Night’s Dream</i>, or <i>Merchant of Venice</i> (ISBN: 978-1-58617-320-3)</p>	<p>Additional Selections From: Anglo-Saxon poetry, including “The Dream of the Rood” and “The Wife’s Lament” Milton, John, <i>Paradise Lost</i> More, Thomas, <i>Utopia</i> <i>The Song of Roland</i> Aligheri, Dante, <i>The Divine Comedy</i></p>
--	---

English III, America/Poetry

Cycle III is a study of American literature, and the effects of American culture on the development of literary genres and themes. English III also includes a genre study of poetry and the creative writing of poetry. American literature also offers an appropriate focus on the rhetoric of public speaking and the style of editorial. Students continue to work on academic writing, advancing from the essay to the full-length thesis paper and beginning to examine and practice various rhetorical devices.

<p>Required: Hawthorne, Nathaniel, <i>The Custom House</i> and <i>The Scarlet Letter</i> Ralph Waldo Emerson, “The American Scholar” Harper Lee, <i>To Kill a Mockingbird</i> Twain, Mark, <i>Huck Finn</i> Whitman, Walt, selected poems, including “One’s Self I Sing,” “I Hear America Singing,” “When Lilacs Last in the Dooryard Bloomed,” and “O Captain, My Captain” O’Connor, Flannery, selected short stories Ernest Hemingway, <i>The Old Man and the Sea</i></p>	<p>Additional Selections From: Poetry selections for the purpose of teaching meter and form Poe, Edgar Allan, selected poems and short stories James, Henry, <i>Portrait of a Lady</i>, or <i>Daisy Miller</i></p>
---	--

English IV, Modern

English IV marks the passage from the pre-Enlightenment worldview to the post-Enlightenment struggle with the loss of meaning. Additional texts are chosen to offer a literary study of themes from Cycle IV Religion and History. Also in Cycle IV, students break out of the rigors of the

standard academic essay to study rhetoric more formally and write more complex and convincing papers.

<p>Required: Alfred Lord Tennyson, "In Memoriam" Additional poetry from Matthew Arnold, Gerard Manley Hopkins Jonathan Swift, <i>Gulliver's Travels</i> (ISBN: 978-1-58617-395-1/ISBN 10: 1586173952) Solzhenitsyn, <i>One Day in the Life of Ivan Denisovich</i> (ISBN: 978-0-451-53104-9) Chesterton, <i>The Man Who was Thursday</i> (ISBN 10: 0141191465) Josef Conrad, <i>Heart of Darkness</i> Lewis, C.S., <i>Out of the Silent Planet</i> Shakespeare, <i>The Tempest</i></p>	<p>Additional Selections From: Lewis, C.S., <i>Perelandra</i> Abrams, M.H. Religion

Religion is, of course, not just a subject at St. Ambrose Academy, but the golden thread tying all the courses and lives of the faculty and students together.

Religion I, Sacred Scripture

This course offers students a deeper study of Sacred Scripture, reviewing the salvation history learned in Junior High, but with an added emphasis on the unity of the canon of scripture and the Church's method of reading Scripture. In addition to the study of Scripture itself, students read *Dei Verbum*. The guiding question of the course is "Who are you, Lord?"

Aware that "ignorance of Scripture is ignorance of Christ," as St. Jerome said, this class gives students the tools to plumb the depths of Scripture and to see that errors in reading Scripture lead to a loss of relationship with Christ's Body, the Church. Students pray *lectio divina* with the Psalms regularly in class. A close study of ST II-II, q. 110 on lying forms the Thomistic portion of the class.

Religion II, Church Fathers and Medieval Theology

This course begins with a study of traditional formal Logic, which strengthens the students' critical thinking as well as providing a philosophical vocabulary for theological study – essence, matter, form, etc. From Logic, the course turns to the early Church where students become intimately acquainted with the Church Fathers through their lives and writing offering a compelling illustration of the Apostolic Church and the witness to Christ against prevailing pagan norms. Their theological training also includes an intense study of the early Trinitarian and Christological heresies (Gnosticism, Docetism, Arianism, etc.) in order to fully comprehend the Creed and be on guard against their modern counterparts. The study of the Church Fathers ends with St. Augustine's *Confessions*, which, while providing immense instruction in theology, is a highly relatable story for young people today. The last section of the course works in partnership with History II, offering a study of major medieval developments, such as the method of scholasticism, and the counter-reformation, from a theological rather than an historical perspective.

The guiding theme that unites the semester is the relationship between faith and reason – that reason is a beautiful gift of the human person but is limited in its power to know and serve God. The intellect requires revelation, the will requires God's grace, and a loving God comes down to our level to save us. Daily scriptural reading is focused on the book of Wisdom. The Thomistic portion of the class comprises a close study of ST I, q. 1, a. 1 on divine revelation and ST I, q. 2 on the five ways of proving the existence of God.

Religion III, Moral Theology / Liturgy & Sacraments

This class focuses on moral theology and the Sacraments and through each encounter the theology of Thomas. The Church's moral system and its sacramental system borrow heavily from the language and systematization of Aquinas. This is a natural way to teach the Thomistic method, via specific topics, but without being limited to Aquinas. For both moral theology and sacraments the teacher can begin with the basic premises of the Summa and then move into other texts, including Church teaching, particularly in the Catechism, and rudimentary principles of ecclesiology.

Religion IV, The Church in the Modern World

This course explores the history of the Church from the late 19th century to the present day, focusing on important writings of Popes, ecumenical councils, and theologians of this time. By studying these texts in depth, we will come to understand more fully the role of the Church in the modern world.

Latin

The study of an inflected language such as Latin lays a grammatical foundation for the study of any language. Knowledge of Latin aids in the study of the Romance languages, enhances a student's ability to express himself well in English, hones logical and organizational thinking skills, and assists students who continue in science, medicine, and the humanities. All students are required to complete two years of Latin successfully.

Math and Science Overview

In Math, senior high students test into the level that is most appropriate for them. Our goal is to keep students at the appropriate level for their current level of mastery, as well as on a reasonable track for the pace at which they will best learn the material.

Students entering the Senior High, as well as students finishing the St. Ambrose 8th grade Algebra course, will be tested for placement in math their senior year. Many students will begin with Algebra I in high school, while others will proceed to Geometry freshman year. Alternative math classes are offered during Junior and Senior year for both accelerated students, and students interested in more applied math. All students are required to take at least three years of math.

In Science, all senior high students take Biology and Chemistry. Upper-level options include Physics, Advanced Chemistry, and Biology II. All students are required to take at least three years of science.

Math

The Academy's math courses help students learn to solve problems by providing them with computational skills and an understanding of the ideas underlying those skills. Advanced math courses also help students understand and engage in formal reasoning. Students will be placed based on prior performance and placement testing.

This course is offered based upon teacher availability when two or more students wish to enroll.

Science

The St. Ambrose Science program helps students understand and marvel at the natural world while preparing for college and life in a technologically and scientifically advanced culture. The Academy's science courses help students appreciate the scientific method and learn what a scientist means in making a claim about the nature of the world. Guided by the Catechism's assertion that "there can never be any real discrepancy between faith and reason" (#159), our courses seek to resolve any apparent conflict between science and Catholic teaching. Throughout their study of science, students study writings that put science in the context of faith.

Teachers may provide additional instruction to help students prepare for the AP and other advanced science exams.

Biology I

The course treats the study of life, ecology, life of the cell, genetics, the history of life, and an overview of the classification of life ranging from viruses and bacteria to the human body. *HMH Science Dimensions: Biology* (ISBN: 9780544861787).

International Theological Commission, “Communion and Stewardship: Human Persons Created in the Image of God,” 2004, 62-70 (Church teaching on faith and science)
<http://www.bringyou.to/apologetics/p94.htm>

The topic of human reproduction is covered in the textbook. Catholic schools come to different conclusions on how to teach human sexuality when considering documents such as the one published in 1995 by the Pontifical Council on the Family, *The Truth and Meaning of Human Sexuality: Guidelines for Education within the Family*. (www.vatican.va)

St. Ambrose Academy was privileged to meet with Bishop Robert Morlino to discuss how we can best serve the local Church in approaching this topic. Our conclusions follow:

At St. Ambrose Academy, Senior High Biology covers human reproduction. We assert that it is important for students to know who they are and how they were made in the lovingly providential design of their Creator. God has ordered the human body to work in a particular way, and by learning as much as they can about exactly how the body works, students are given insight into the Creator. Moreover, knowledge about embryonic and fetal development is important when engaging in dialogue with the culture, particularly in reference to life issues such as abortion, contraception, embryonic stem-cell research, in-vitro fertilization, and cloning.

Biology class must teach that:

- The fertilized egg is a unique individual of the human species with a unique genetic map.
- There is no difference between an “individual of the human species” and a “human being.”
- Whatever dignity is ascribed to the human being is therefore necessarily ascribed to the fertilized egg, regardless of age.

The biology teacher aids in providing an integral education by noting important questions raised but unanswered by scientific reasoning so that these questions can be addressed in religion and philosophy class (for example, on the nature of human dignity, the nature of marriage, etc.). References to the other disciplines encourage a humble view of science and what it really can answer. It is critical that students believe in the existence and accessibility of truth.

Chemistry I

The course studies atomic structure and the properties of atoms, molecules, and matter during physical change and chemical interactions; forces within atoms, molecules, and matter; the exchange of energy involved in physical changes and chemical interactions; how substances

interact with one another to produce new substances; patterns in chemical and physical properties; chemical reactions; and laboratory skills including writing formal lab reports.

Glencoe, Chemistry, *Concepts and Applications* (ISBN 9780028282091)

Biology II

Biology 2 is open to 11th and 12th grade students who have received a passing grade in Biology. It offers an advanced and more thorough study of the topics covered in Biology, as well as new topics not broached in the lower-level course.

Physics: Electricity and Magnetism

Physics: Electricity and Magnetism is an Algebra-based study of waves, light, magnetism, electricity and electronics. Hands-on and virtual labs are provided throughout the year, covering a wide variety of physical phenomena. Students will get hands-on experience in working with electronic circuitry and building their own circuits using breadboard kits.

Physics: Force and Motion

The course studies motion, forces, gravitation, momentum and its conservation, energy, work, and simple machines, energy and its conservation, thermal energy, states of matter, vibrations and waves, sound, fundamentals of light, reflection and mirrors, refractions and lenses, interference and diffraction, static electricity, electric fields, current electricity, series and parallel circuits, magnetic fields, electromagnetic induction, electromagnetism, quantum theory, the atom, solid-state electronics, and nuclear physics.

Electives

Art

Art studies include historical and modern works of art, medium technique study, basic anatomy, 3-dimensional study, and cultural art. Influencing each of these areas of study is the beautiful “Letter to Artists” of Pope John Paul II. (www.vatican.va)

Band / Orchestra

These elective courses include individual instrument lessons, group lessons, end-of-semester performances, and other opportunities for playing publicly. Students in these programs also prepare for Solo/Ensemble competitions. These courses are offered depending on student interest.

Concert Choir

Concert Choir is a non-auditioned choir at the high school level. Students will grow in technique, theory, and ensemble singing at an intermediate level. This ensemble will perform in two concerts throughout the year: Lessons and Carols in the winter, and a cycled* spring concert. Students are always welcome to audition the following year for Chamber Choir or continue to grow in their skills in Concert Choir.

Chamber Choir

Chamber Choir is an auditioned choir at the high school level. Students will grow in technique, theory, and ensemble singing at an advanced level. This ensemble is expected to have prior musical knowledge. Much like Concert Choir, Chamber Choir will perform in two concerts throughout the year: Lessons and Carols in the winter, and a cycled* spring concert.

**Cycles: Through a 4 year cycle, students will learn music, theory, and techniques at different levels from following genres/periods: Medieval, Renaissance, Baroque, Classical, Romantic, Modern, Sacred music, American, South American, and European composers.*

Drama

The first semester of this course focuses on acting skills. Students will develop concentration, characterization, physical agility, and creativity through the use of improvisation, pantomime, monologues and directing. The second semester focuses on bringing great literary texts to life, from Greek tragedy to Shakespeare to modern theater, using the skills built in the first semester. The year will culminate in presenting rehearsed scenes.

Physical Education

The “good, true and beautiful” can be learned through physical exercise and sport as well as in academic courses. Physical education classes are held once a week either outdoors or at local facilities, such the Keva Sports Center and Capitol Ice Arena. Students are introduced to a variety of games/activities throughout the year which include volleyball, kickball, capture the flag, dodgeball, bowling, ice skating, pickleball, basketball, floor hockey, soccer, ultimate frisbee, sledding, badminton, and touch football.

Rhetoric

This course is for anyone who loves, or wants to learn to love, public speaking. Our emphasis is on persuasion, and students will learn the art of rhetoric through exposure to Aristotle’s *Rhetoric*, reading and listening to great speeches, practicing impromptu speeches, and delivering an 8–10-minute persuasive speech at the end of the semester. This would be a great course for anyone interested in apologetics, law, advertising, marketing, or who just wants to develop self-confidence and improve their writing and public speaking.
